

Erasmus Memories

Zamora – Toulouse

Presented by

EVA DE LA TORRE Y
EMMA FRADEJAS

DATE 16 January, 2026

*This presentation explores through
cultural, diverse landscapes, lifestyles*

Pre - mobility activities

The padlet

Before meeting our hosts we made a padlet where we described how we are to get to know each other better and see with which French women we shared more tastes or hobbies. We also made an avatar using AI. After we choose our exchange partners, we talked on WhatsApp about our affinities and family.

The teachers asked us to create a logo of the meeting

Mobility Activities

Monday , morning

When we arrived at the high school, they gave us a tour of the secondary school. They have different schedules there, but above all, they have better facilities. Then they welcomed us with hot chocolate and croissants in the cafeteria. After the welcome, they took us to a painting class where they had painted the exchange logo on a piece of wood.

Mobility Activities

The exhibition

Monday , afternoon

In the afternoon we did some activities designed for the European knowledge. We worked in mixed groups (French and Spanish) where they gave us letters about the culture of a European country and we had to guess which country it was on the map. Then we did an exhibition about the educational systems in Spain and in France in which we discussed our opinions.

Mobility

Activities

Tuesday

We visited "La turbine", a research center. There they explained to us how researchers work with artificial intelligence. We made teams to participate in each workshop of the researchers. My favorite was how AI can influence in our future work, it can be beneficial because it can help you but on the other hand in the future it could replace your work. Then, we ate all together at the river and in the afternoon we did a treasure hunt in which we had to follow a clue from a notebook to arrive to historical places.

Wednesday

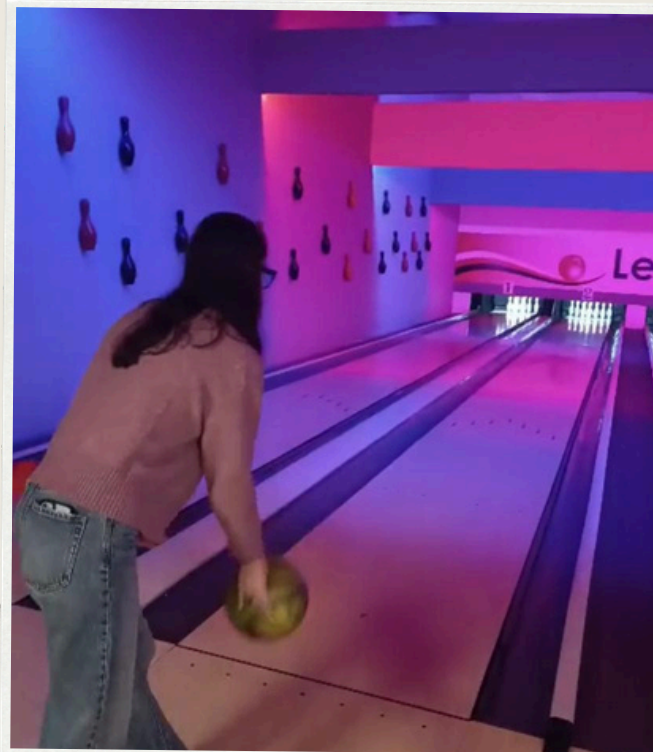

In the morning, the Spanish students had classes with their french where we could compare the two educational systems. In physical education Emma and I played volleyball where we played matches with the French (we Spaniards clearly won).

On Wednesday afternoon we didn't have any activities and it was time to enjoy with the families and do activities with their friends.

In my case, we went to play bowling where we also beat the French, personally I had never played bowling and I liked it a lot.

Activities

Mobility Activities

The cinema

Thursday

In the morning we went to the movies and saw a film about a boy who fell in love with an AI. Afterwards we had a little chat about the film.

In the afternoon, we went to the town hall of Castelnaudary, where we were given a short talk and had lunch. After that, we went on a treasure hunt around the town, which I really liked, along with the views and some of the churches we saw.

Mobility Activities

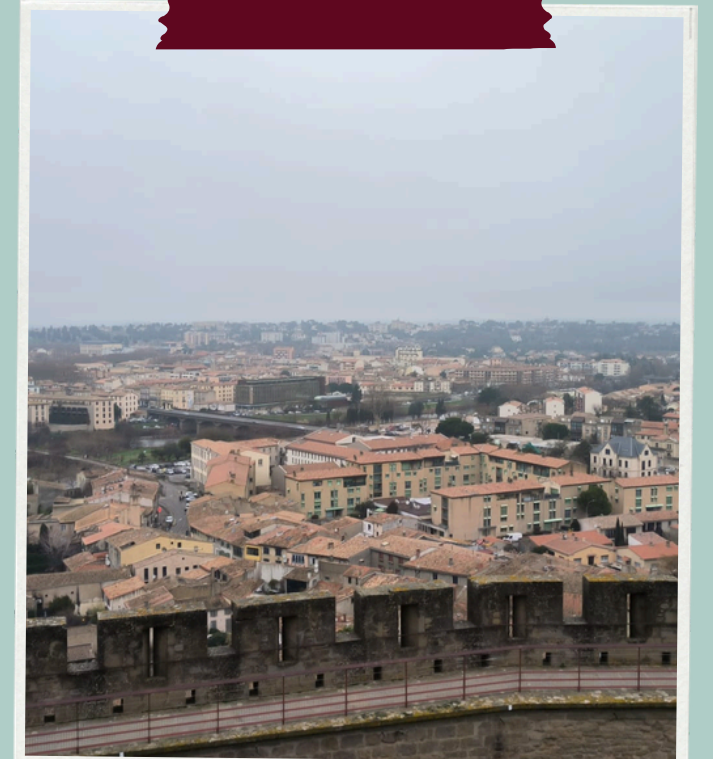

Friday

In the morning, we went to the town of Carcassonne, which is a medieval city. It was small, had a large castle, and was surrounded by a wall.

Then we went to the school, where the French students showed us some posters they had made about AI, we ate some empanadas, and they gave us diplomas for the exchange.

Carcassonne

Carcassonne

Final Message

After spending five days with the French, we noticed some differences: they spend more time with their families, classes are more serious, and supermarket prices are higher.

My favorite day was Wednesday because I really enjoyed playing volleyball at school, and in the afternoon I went to Toulouse with some friends.

My favorite day was Friday because I really liked the town of Carcassonne . I think it's a beautiful historical city , the most special thing was the old castle .

The best thing about the exchange was being with Eva

Conclusion : we had other expectations of an exchange

Recap !

Funny photos

Thank you very much.
